NEW Diesel Engine Forklift Trucks

Your satisfaction is our Priority

110/130/160D-7A

Full Equipment

Instrument Switch Panel

Air Conditioner & Heater

Rear View Camera

Wheel Angle Sensing
& Load Indicator (Option)

ESL (Engine Start Limit)

The new Job site master

The efficient and ergonomically designed 110D-7A/130D-7A/160D-7A are made to fit you needs.

Powerful Engine

Cummins QSB6.7 Engine

The six cylinders turbo-charged engine is built for power, reliability and economy. This engine meets EPA Tier 4 and EU stage IIIB emission regulation.

Variable Geometry Turbo

Unique sliding nozzle design controls EGR flow and boosts response at all engine speeds.

New CM2250 (ECU)

3 x faster processing power
2 x increased memory capability
Increases HPCR capability and provides a seamless interface to equipment systems.

Clean Crankcase Filter

Removes crankcase emissions and eliminates oil drips or mist for ultra-clean engine operation.

High Efficiency Combustion

Removes high value of PM at source – less for catalyst to remove. Incorporates a proven cooled EGR system enabling up to 5% improved fuel efficiency.

123 KW / 2200 rpm

74.6 kgf.m / 1500 rpm

Engine control mode

Depending on the required power the driver has the choice between :

Standard mode: Optimised fuel consumption when working in a light or medium application;

Power mode: In a heavy application extra power is available.

Adjustable engine idling RPM

With the engine running the driver can change the idle RPM in steps of 25 RPM.

Electronic Full-automatic Transmission

The high quality ZF transmission has proven it's durability and ease of use together with soft and smooth gear changes.

Self Diagnosis Function Error indication on display

Transmission control switch

The operator has the choice between shifting manually or in the automatic modes choose between a two or a three step transmission.

Full lighting

In order to provide the driver visibility in all circumstances work lamps are standard both to the front and to the back.

Increased mast tilting angle

Maximum mast tilting angles of maximum 15° forward and 12° backwards are possible.

High Power
Low Noise

■ Photo may include optional equipment

Faster travel speed & better gradability

The powerfull engine combines fast acceleration with high travel speed and excellent gradability.

**Gradability
(Loaded)**

110D-7A : 38.2 % (20.9°)
130D-7A : 34.6 % (19.1°)
160D-7A : 33.7 % (18.6°)

**Travel speed
(Unloaded)**

110D-7A : 34.7 km/h
130D-7A : 34.5 km/h
160D-7A : 29.1 km/h

Comfortable operation!

A design based on human engineering relieves fatigue and increases operator's efficiency.

Wide visibility with Round Front Glass

Operator friendly gauges and water-resistant monitor panel

High-capacity air conditioner & heater

An integrated air conditioner and heater saves space inside the cabin. With its high capacity, the operator is, both in summer and winter, able to create a pleasant operating environment.

Heated air suspended seat with head rest (Option)

A seat designed to work a full shift in all comfort and with maximum ergonomy.

Rear view camera

The rear view camera makes the operation more easy and convenient. And it supports 4 camera channels.

Wheel Angle Sensing (Option)

Real-time steering wheel angle is displayed on the monitor.

Load Indicator (Option)

The weight of the load is displayed on the screen. The driver is alerted when he is overloading the machine.

Centralized Instrument switch Panel

USB MP3 Player & Remote Control

■ Photo may include optional equipment

Hands free Bluetooth system

Quick response of hydraulic levers

Only minimal operator's effort is required for precise, safe and productive control.
(4-Levers : standard)

Ergonomical positioned pedals

Based on human engineering, the accelerator, brake and inching pedals are optimally positioned.

Adjustable steering column

Safety through high durability!

Safety and durability are priorities in design of our equipment.

Efficient cooling system

A hydraulic fan motor ensures that the fan speed is always optimised depending on the temperatures of the intake air, transmission oil, hydraulic oil and engine coolant. This reduces both noise production and energy consumption.

OPSS

(Operator Presence Sensing System)

When the driver is not in the seat, no driving or mast movement is possible.

Kessler drive axle

The Kessler drive axle delivers the desired torque to the wheels and ensures smooth driving.

Auto parking

The parking brake will automatically be engaged when the driver leaves the machine with the transmission in neutral.

Wet disc brake system

Wet disc brakes improve the brake performance and make your service intervals longer. Enclosed brakes are protected against dust and water.

Protector for hub bolts

By applying protector for preventing bolts breakage durability has been improved. (Same size of front and rear wheels)

Cylinder guard

This guard helps to prevent possible damage on the cylinder rod from any foreign material.

Grease fittings

Grease fittings are installed for easy access to steering axle center pin when doing service checks.

■ Photo may include optional equipment

Durable mast & carriage side rollers

The durability of mast and carriage is increased with the use of side rollers.

Reliable fork carriage

High tensile structural steel is used to strengthen the fork carriage. To insure safety the width of the fork carriage is smaller than the overall width of the machine.

Large footboard & handle

Wide "open" step offers convenience and safety when entering and exiting your truck.

Centralized design for easy service!

An ideal arrangement of components ensures easy access for service and maintenance.

Large engine hood

Highly accessible engine compartment assures fast and efficient maintenance.

Cabin Tilting automatic system

Cabin tilting electronic system makes servicing of all power train components quick and easy. An electrically assisted hydraulic actuated cylinder tilts operator cabin to left side about 65 degrees for easy access to inside of truck components.

Easy change of air cleaner

This air filter is readily accessible for cleaning or replacement.

Cabin air fresh filter

The pressure inside the cabin is slightly higher than outside. This excludes dust from the cabin and reduces noise levels.

Compact fuse box for easy inspection

Mechanic Friendly Fuel Filter Replacement

Highly accessible engine compartment allows for quick replacement of filters.

Electrically monitored air filter

To avoid any damage, a sensor alerts the driver when the air filter is clogged.

Automatic locking gas spring

Engine compartment hood is safely kept open by a self locking gas spring.

■ Photo may include optional equipment

Master switch

The master switch will protect the battery from electrical drainage.

Large tool box

Pressure gauge port

Easy engine oil check

Mast specifications
